

SEYMOUR POOL SAFETY SERVICES

Our range of POOL BARRIER SERVICES includes:

- Pool registrations.
- Pre inspection reports.
- Pool barrier certification.
- Pool barrier advice and consultation.
- Annual notification of pool certificate expiry.

Our unique customised report process focuses on identifying your compliance needs. This ensures that we accurately determine non compliant barriers or items and provide cost effective solutions.

WHY CHOOSE SEYMOUR CONSULTANTS

As market leaders in the area of safety, we have been inspecting pools and pool fences before the introduction of recent pool safety laws. At Seymour Consultants we pride ourselves on excellence and make it our mission to provide a level of service that separates us from our competitors.

- Licensed and Insured Pool Inspectors
- Work, Health & Safety Accreditations
- Friendly, Reliable and Professional Staff
- Personalised Delivery
- Cost Effective Solutions

POOL SAFETY LEGISLATION

The introduction of new pool safety laws has had a significant impact on pool owners. The laws introduced are aimed at reducing the amount of swimming pool incidents that occur on an ongoing basis. Research suggests that the incidents that occur are usually involving children under the age of five. Such incidents have resulted in long term illnesses, spinal cord injuries and loss of lives. The Pool Safety Standards apply to all pools associated with houses, units, hotels, motels, backpacker hostels, caravan parks, mobile van parks and other forms of short-term accommodation. The Pool Safety Standard also applies to indoor pool and portable pools capable of greater depths than 300mm.

POOL SAFETY TIPS

- Ensure that the height of the fence is at least 1200mm.
- Remove or shield any climbable objects from the fence i.e. trees, shrubs, pot plants or creepers that may provide footholds.
- Ensure that you have the latest CPR signage displayed.
- Gates must self-close and self-latch from all positions.
- Apply routine maintenance to all hinges and self-closing devices on gates.
- Gaps of no more than a 100mm between the lowest horizontal section of the fence and ground level.
- Gaps of no more than a 100mm between two vertical palings/uprights.
